

SPEED

Inflatable life jacket for sea rescue, specifically designed for lifeguards and already successfully tested by the National Lifesaving Society (Società Nazionale Salvamento) <http://www.bagnini.org/it/test/speed.php>, determined to be suitable and recommended for lifeguard rescue operations, even in rough waters and in rough currents, both when swimming towards the device and when returning the person to safety. It guarantees adequate buoyancy support and a sufficient safety margin for both the rescuer and the person in danger.

Manufactured in red, with the word "SALVATAGGIO" printed in white lettering on the back, it can replace the classic red T-shirt required as standard equipment by beach safety regulations. Made of durable lined neoprene material with a dual inner and outer layers, plus internal breathable mesh on the inside, it allows the lifeguard to wear the device even for hours in the sun, minimising discomfort caused by heat.

This is a 50N inflatable buoyancy device, comparable to a "buoyancy aid". It can be manually activated by pulling a cord that opens the internal inflatable chamber of the jacket, thanks to a 12-gram CO₂ cartridge. Inflation can also be activated (or maintained once the chamber has been opened) via an oral inflation tube positioned on the side. Once discharged, the CO₂ cartridge can be easily replaced by purchasing another from authorized VSG dealers.

A one-size jacket that is easy to wear and adjustable to fit almost all people with a chest circumference between 80 and 125 cm, thanks to the double side adjustment consisting of two quick-release buckles with safety lock

Standard accessories: 1 CE-certified whistle, in addition to the mandatory whistle that the lifeguard must

FEATURES	
Type	Buoyancy Aid
Activator	UML Micro Manual - manual activation and oral inflation tube
CO₂ Cartridge	12 g CO ₂ cartridge, 1/2" GAS threaded
Actual Buoyancy	50 N
Class	50 N
Compliance	ISO 12402-5
Size	Adult
Waist Circumference	80 - 125 cm
Inflation Chamber	Single chamber, PA 420 PU-coated material, fluorescent yellow color
Warranty	24 months
Inspection	Every 24 months
