

# EXCLUSIVE SAFETY TECHNOLOGIES

Safety at sea is our main priority. We manage all research, design and production processes with the utmost care so as to offer certified equipment for all nautical fields, with the highest production standards.

All research and development activities are certified by the Department of Applied Science and Technology of the Polytechnic University of Turin, in accordance with EU regulations.

## THE PRODUCTION PROCESS AND TRACEABILITY

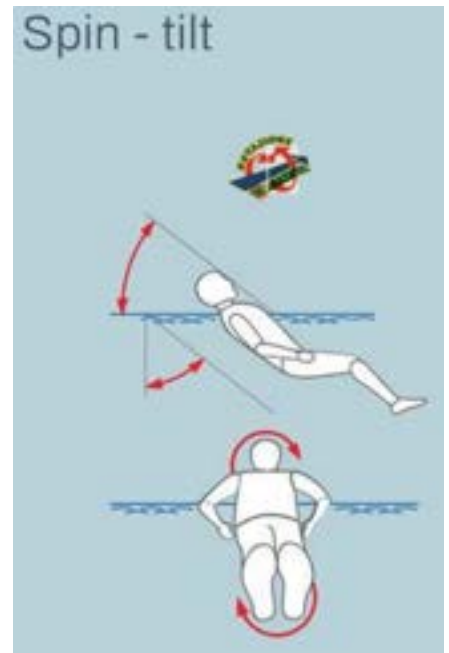

With the aim of making inflatable life jackets more reliable, in 1994 Veleria San Giorgio introduced the Unique Product Code system. As the only manufacturer in the world to employ this type of technology, VSG is now able to identify all materials and individual components utilised through distinct alphanumeric codes.

Production processes are controlled via software specially developed by VSG, covering 100% of production so each product can be traced back to its buyer with absolute precision.

This drastically reduces manufacturing defects (less than 1/10000 of returns), guaranteeing each buyer a unique product in the truest sense of the word and - most importantly - the highest degree of safety when needed.

Thanks to their ergonomic features, our life jackets guarantee an optimal position in the water and great stability. In addition, the vests offer enough buoyancy to rotate and tilt an unconscious person, so as to always keep the airway out of the water.

The three-dimensional X3D system with single-compartment flotation chamber is made of PA 420 OU COATED material with electronically-controlled high-frequency welding. The system ensures the quick and immediate rotation of the body in the water.

# MODULO CP1530 COMP 275

Device compatible with most fall arrest harnesses.

Inflatable life jacket for adults. Approved and certified by SOLAS M.E.D.  
Safety device developed to technical specifications for the Italian Coast Guard - Port Authorities.

The jacket comes with integrated safety harness and dual-compartment chamber. Two independent activation systems with pressure relief valve.

Casing in high-strength material, with zip opening/closing and quick system opening system suitable for chamber expansion.

On the collar, at the nape of the neck, is a detachable, washable fleece-lined collar to ensure adequate comfort for the wearer.

On the left side of the casing is an inspection window at the base for checking the status of the activation system, without having to open the casing itself.

On the same side, at the top, is a band for attaching the VHF unit's microphone.

On the right side of the casing, at the base, is the corresponding female Velcro piece to hold the user's identification. A band of the size required to secure the VHF unit should be found on the same side.

Equipped with: automatic light, Buddy System, crotch strap, floating knife, emergency signal pouches.

Device compatible with most fall arrest harnesses.

## DONNING INSTRUCTIONS

# MODULO CP1530 COMP 275

Device compatible with most fall arrest harnesses.

Inflatable life jacket, ISO SOLAS M.E.D. certified, class 275, effective buoyancy 290 N, integrated ISO 12401 harness with steel clasp with quick side adjuster.

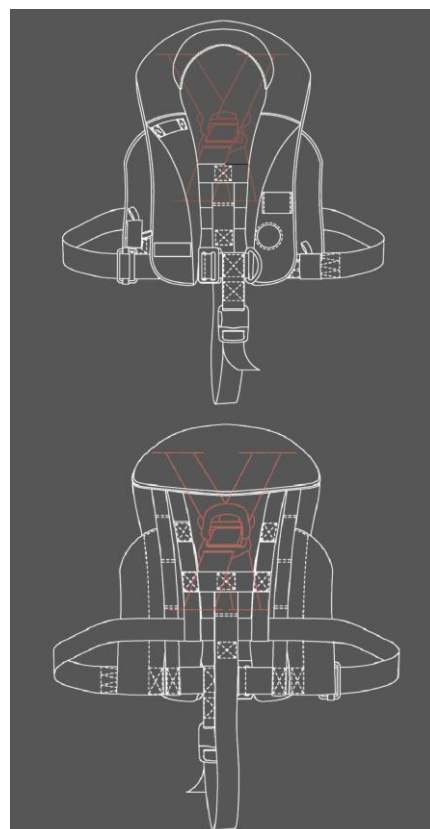

Individual safety device made specifically for the Coast Guard - Port Authority operators.

Provides maximum safety for any type of navigation.

Easy and intuitive to wear, it offers the utmost freedom and mobility aboard during navigation manoeuvres.

## PRODUCT CHARACTERISTICS

- Velcro closure
- Steel clasp with quick side adjuster
- Safety line ring
- Floating knife
- Polyester accessory pouches
- Rescue aid handle
- Lifting handle

### LEGEND

DAA - Dual Automatic Activator  
 DAAM - Double Automatic and Manual Activator  
 SAA - Single Automatic Activator

# MODULO CP1530 COMP 275

Device compatible with most fall arrest harnesses.

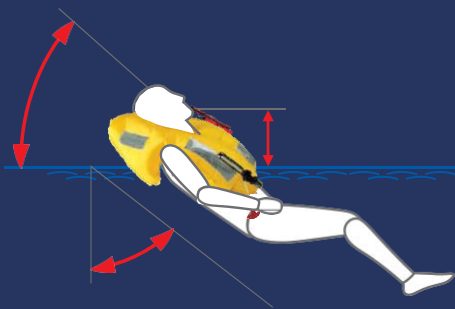

Double-compartment floating chamber with X3D system having a single-compartment rotation system in PA 420 PU COATED material with electronically-controlled high-frequency welds. Designed to contour to the body's ergonomics and optimise positioning in the water. Thanks to the special V-shape, it guarantees an immediate rotation of the body and, through the "fins" structure behind the nape, provides excellent support and perfect stability to the wearer's head. The chamber's design guarantees the best clearance of the mouth above the water in the inflatable vests category.

## ACTIVATION SYSTEMS:

- Automatic - Upon falling into the water, the system automatically activates within 5 seconds of submersion, with the inflation of the floatation chamber. Automatic activation is possible via the Hammar hydrostatic system.
- Manual - The system is operated through pulling the dedicated lever. The product comes with the manual Hammar activator and is activated exclusively by hand.
- Oral - This type of inflation is achieved via the special mouth tube, with a non-return valve and protective cap. To inflate the chamber, simply blow into the tube.
