ESCLUSIVE SAFETY TECNOLOGIES

Safety at sea is our main priority. We manage all research, design and production processes with the utmost care so as to offer certified equipment for all nautical fields, with the highest production standards. All research and development activities are certified by the Department of Applied Science and Technology of the Polytechnic University of Turin, in accordance with EU regulations.

THE PRODUCTION PROCESS AND TRACEABILITY

With the aim of making inflatable life jackets more reliable, in 1994 Veleria San Giorgio introduced the Unique Product Code system. As the only manufacturer in the world to employ this type of technology, VSG is now able to identify all materials and individual components utilised through distinct alphanumeric codes.

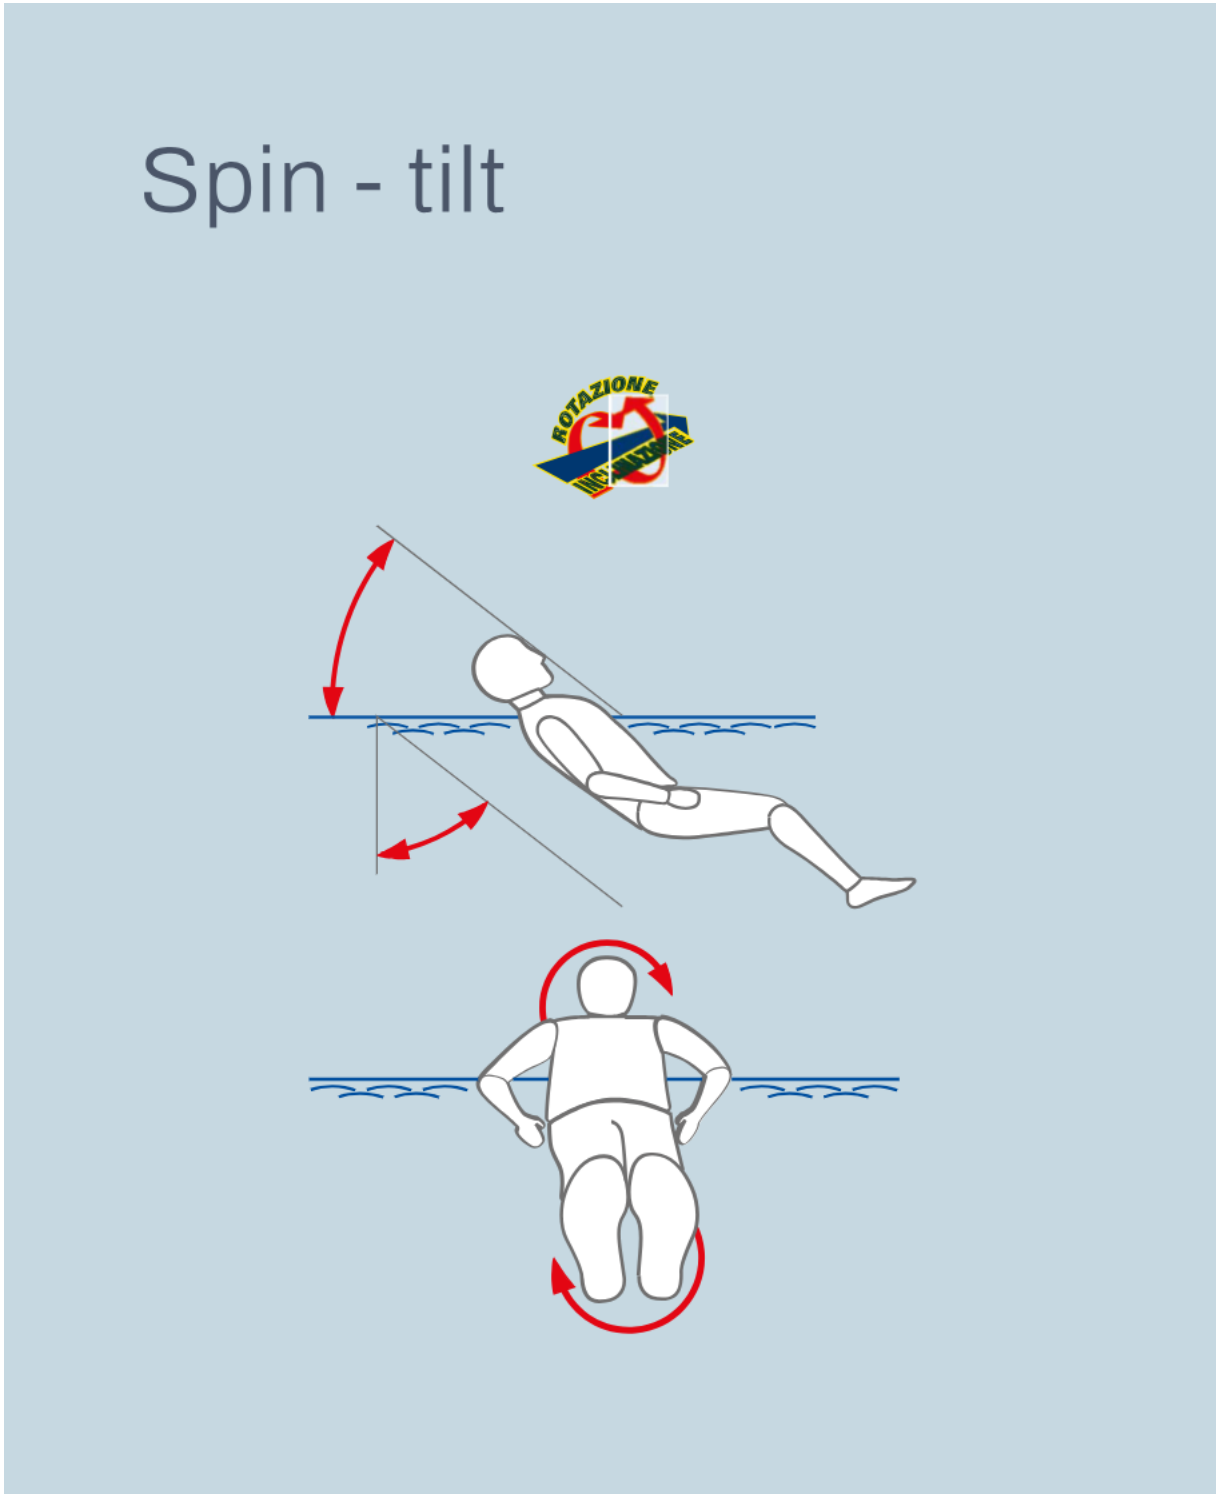
ISO 9001:2015

Production processes are controlled via software specially developed by VSG, covering 100% of production so each product can be traced back to its buyer with absolute precision. This drastically reduces manufacturing defects (less than 1/10000 of returns), guaranteeing each buyer a unique product in the truest sense of the word and – most importantly – the highest degree of safety when needed.

Thanks to their ergonomic features, our life jackets guarantee an optimal position in the water and great stability. In addition, the vests offer enough buoyancy to rotate and tilt an unconscious person, so as to always keep the airway out of the water.



SKIPPER GHOST 150

Inflatable life jacket certified in accordance with ISO 12402-3, Class 150, with actual buoyancy of 150 N. It features a quick-release buckle closure system made of acetal resin with integrated adjustment. Designed for recreational activities carried out in the open sea and/or in adverse weather conditions, it allows the wear to safely await rescue, even in rough waters.

Ensures maximum safety for all types of navigation.
Easy and intuitive to wear, it provides the utmost freedom and mobility on board during sailing manoeuvres thanks to its very compact size.

MAIN CHARACTERISTICS:

- Back strap
- Mesh fabric coated with transparent PU (for visibility of the internal components)
- Velcro closure
- Quick-release buckle with integrated adjustment
- Recovery assistance handle at the nape
- Lifting handle
- Removable light strip for improved visibility on board and in the water – can be manually or automatically activated upon contact with water
- Comes with waterproof power bank, which can be inserted in the dedicated sleeve

Light strip

Item 09230/24/GHOST

CODE	PRODUCT NAME	ATTIVATION	ATTIVATOR
09230/24/GHOST	SKIPPER GHOST 150	AUTOMATICO	UML MK5-HR
09231/24/GHOST	SKIPPER GHOST 150	MANUALE	UML MICROMANUAL

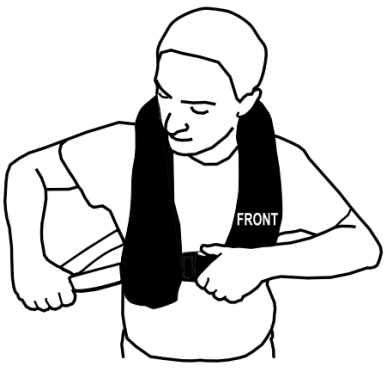
Date: 16/03/26
Rev: 01

FEATURES	
Type	Inflatable lifejacket
Activators	UML MK5: (09230/24/GHOST) UML Micro Manual: (09231/24/GHOST) Mouth tube on all versions
Cylinder	33-gram cylinder, 1/2" GAS thread (all versions)
Actual buoyancy	150 N
Class	150 N
Closure system	Quick-release buckle in acetal resin with integrated adjustment
Certifications	ISO 12402-3
Size	Adult
Supported weight	> 40 kg
Waist circumference	86–125 cm
Casing	Material: Black mesh, PU-coated, available in black
Chamber	Single in material: PA 420 PU-coated, in yellow colour or fluorescent; high-frequency welded
Product packaging	Transparent bag
Product dimensions	50 x 26 x 5 cm +/- 5%
Product weight	09230/24/GHOST (approx. 900 grams) 09231/24/GHOST (approx. 850 grams)
Packaging	60 x 40 x 40 cm (14 pz)
Revision	Every 24 months
Optional accessories	Automatic emergency light, crotch strap, safety line
Spare parts	Whistle, rearming kit
Veleria San Giorgio reserves the right to modify technical specifications without prior notice	

DONNING INSTRUCTIONS

1. Put on the life jacket

2. Fasten the buckle



3. Adjust the waist strap

Single-chamber flotation chamber made of PA 420 PU-coated fabric with electronically-controlled high-frequency welds. This ensures optimal positioning in the water and perfect stability. The buoyancy is enough to rotate and tilt an unconscious person, keeping the airway above water. Even with the chamber inflated, it is possible to swim comfortably to reach a safe location or quickly board a liferaft.

ACTIVATION SYSTEMS:

• Automatic - Upon falling into the water, the system is submerged and automatically inflates the flotation chamber within 5 seconds. Automatic activation occurs via the UML MK5 salt actuator, through the dissolution of a water-soluble tablet, or alternatively via an HR actuator.

• Manual - The system is operated by pulling the designated lever. It is supplied with the UML MICROMANUAL manual actuator and is activated exclusively by hand.

• Mouth - This type of inflation occurs through the dedicated mouth tube with non-return valve and protective cap. To inflate the chamber, simply blow into the mouth tube.

SPARE PARTS

UML MK5: Rearming kit (26233), 33-gram cylinder and (25005) green pin.
Micro Manual: (26033) 33-gram cylinder and (25003) green pin.

ACCESSORIES

LED light 03030

Activates automatically upon falling into the water. Visible up to one mile. Certified per SOLAS M.E.D. and USCG approved.

PLB3 AIS 41011

The world's smallest AIS Man Overboard (MOB) device with integrated VHF DSC

MOB1 AIS 41010

The world's smallest personal AIS Man Overboard (MOB) tracking device with integrated DSC

W470 MOB AIS 41012

The W470 MOB AIS is a small and lightweight personal safety device, operating on the maritime VHF band as a MOB AIS plus Homing VHF 121.5 MHz, complete with GPS

Light System + Power Bank 03040/GHOST

Light strip that activates manually or upon contact with water, enhancing visibility on board and in the water

Remember to book a periodic inspection by emailing info@valeriasangiorgio.com or on the website.
