

ESCLUSIVE SAFETY TECNOLOGIES

Safety at sea is our main priority. We manage all research, design and production processes with the utmost care so as to offer certified equipment for all nautical fields, with the highest production standards. All research and development activities are certified by the Department of Applied Science and Technology of the Polytechnic University of Turin, in accordance with EU regulations.

THE PRODUCTION PROCESS AND TRACEABILITY

With the aim of making inflatable life jackets more reliable, in 1994 Veleria San Giorgio introduced the Unique Product Code system. As the only manufacturer in the world to employ this type of technology, VSG is now able to identify all materials and individual components utilised through distinct alphanumeric codes.

È CONFORME ALLA NORMA / IS IN COMPLIANCE WITH THE STANDARD
ISO 9001:2015

Production processes are controlled via software specially developed by VSG, covering 100% of production so each product can be traced back to its buyer with absolute precision. This drastically reduces manufacturing defects (less than 1/10000 of returns), guaranteeing each buyer a unique product in the truest sense of the word and - most importantly - the highest degree of safety when needed.

Thanks to their ergonomic features, our life jackets guarantee an optimal position in the water and great stability. In addition, the vests offer enough buoyancy to rotate and tilt an unconscious person, so as to always keep the airway out of the water.

Spin - tilt

AIR BAG *SLIM* *EVO* 150

Inflatable adult waist-type life jacket with automatic and/or manual activation. Certified and approved according to ISO 12402-3 (Class 150N). The automatic version can be used as onboard equipment for unlimited coastal navigation under Italian regulations.

Closure system with quick-release buckle in acetal resin for integrated adjustment.

Designed for recreational activities at open sea and/or in adverse weather conditions, to safeguard persons awaiting rescue even in rough waters.

The world's smallest life jacket, always ready for use, can be stored anywhere and worn easily in any situation and over any type of clothing, from swimwear to jackets.

MAIN CHARACTERISTICS:

- Waist-type inflatable device with compact design
- Quick-release buckle with integrated adjustment
- Rescue assist handle
- Lifting handle

09205/SLIM/TENDER6.0

09205/1/AIR BAG EVO

CODE	PRODUCT NAME	ATTIVATION	ATTIVATOR
09205/SLIM/TENDER6.0	AIR BAG EVO 150	AUTOMATIC	UML MK5
09206/SLIM/TENDER6.0	AIR BAG EVO 150	MANUAL	UML MICRO MANUAL
09205/1	AIR BAG SLIM 6.0 150	AUTOMATIC	UML MK5
09206/1	AIR BAG SLIM 6.0 150	MANUAL	UML MICRO MANUAL

FEATURES	
Code: 09205/1 - 09205/SLIM/TENDER6.0	
Type	Inflatable life jacket
Inflators	UML MK5: (09205/1 - 09205/SLIM/TENDER6.0) UML Micro Manual: (09206/1 - 09206/SLIM/TENDER6.0) Mouth tube on all versions
Inspection window	09205/1 - 09206/1: Made of transparent PVC with inflator status indicators
Gas cylinder	33 g, 1/2" GAS thread: (09205/1 - 09206/1 - 09205/SLIM/TENDER6.0 - 09206/SLIM/TENDER6.0)
Actual buoyancy	160 N: (09205/1 - 09206/1 - 09205/SLIM/TENDER6.0 - 09206/SLIM/TENDER6.0)
Class	150 N: (09205/1 - 09206/1 - 09205/SLIM/TENDER6.0 - 09206/SLIM/TENDER6.0)
Closure system	Quick-release buckle in acetal resin with integrated adjustment
Certifications	ISO 12402-3
Size	Adult
Supported weight	> 40 kg
Waist circumference	80-125 cm
Case	PL 600D PU-COATED, blue colour (09205/1) PL 600D PU-COATED, white colour (09205/SLIM/TENDER6.0)
Chamber	Single, made of PA 420 PU-COATED
Product dimensions	09205/1: Approx. 26 × 14 × 9 cm 09205/SLIM/TENDER6.0: Approx. (62 × 10 × 8) cm
Product weight	09205/1 (635 g) 09026/1 (580 g) 09205/SLIM/TENDER6.0 (620 g) 09206/SLIM/TENDER6.0 (560 g)
Packaging	60 x 40x 40 cm 09205/1 (30 units) 09205/SLIM/TENDER6.0 (32 units)
Inspection	Every 24 months
Optional accessories	Automatic emergency light
Included accessories	Whistle, Rearming Kit
Veleria San Giorgio reserves the right to change the technical specifications without prior notice.	

DONNING INSTRUCTIONS

1. Open the case

2. Extract the chamber

3. Put the chamber on

Single-chamber flotation chamber made of PA 420 PU-coated fabric with electronically-controlled high-frequency welds. It ensures an optimal positioning in the water and perfect stability. The buoyancy is enough to rotate and tilt an unconscious person, keeping their airways clear of the water. Even with the chamber inflated, it is possible to swim comfortably to reach a safe location or quickly climb onto a liferaft.

ACTIVATION SYSTEMS:

- Automatic: Upon falling into the sea, the system is submerged and automatically triggers the inflation of the flotation chamber within 5 seconds. Automatic activation is possible with the UML MK5 saline activator, through the dissolution of a water-soluble tablet.
- Manual: The system is activated by pulling the designated lever. It is supplied with the UML MICROMANUAL manual activator and can only be activated manually.
- Oral: This type of inflation occurs through the dedicated mouth tube with non-return valve and protective cap. To inflate the chamber, simply blow into the mouth tube.

SPARE PARTS

	Whistle	25180
	A mandatory accessory that provides an emergency acoustic signal. Certified ISO 12402-8.	

Rearming Kit
UML Rearming Kit (26233): Water-soluble tablet, MK5 green pin, 33-gram cylinder

ACCESSORIES

	LED Light 03030
	Activates automatically upon falling into the water. Visible up to one mile. Certified per SOLAS M.E.D. and USCG approved.

Remember to book a periodic inspection by emailing info@valeriasangiorgio.com or on the website.
