SAL 06/M.M.I

The life jacket model “SAL 06”, compliant with the technical specification of the Italian Navy NAV 80-9999-0024-13-00B000, is a personal life-saving device intended for embarked personnel, designed to ensure survival in water in the event of a shipwreck or accidental fall overboard, as well as to enable the recovery of the person by both water and aerial rescue units.
When the life jacket is worn, the deflated and folded compartments are contained within the collar housing, integrated into the vest and closed along the outer perimeter using Velcro-type fastening.
The life jacket is navy blue when deflated, while once the internal chambers are inflated, it turns a high-visibility yellow, making it easier to detect at sea.

The SAL-06 MMI life jacket consists of a cover in high-strength fabric material, two inflatable chambers forming the buoyancy compartments, as well as a crotch strap.
For transport and storage of the life jacket, a convenient carrying case with Velcro closure is provided.

A spray hood is fitted in the upper part of the cover, around the neck area.
This serves the dual function of protecting the survivor from water, spray and solar radiation.

The vest is equipped with two retro-reflective bands on the outer cover, one on the hood and four on the chambers.
It is closed by a central frontal zip.
To prevent accidental opening, the zip is protected by a rectangular flap with Velcro fastening.
Inside the flap is a small pocket containing a line with snap hook (carabiner), useful during recovery and safety operations.

CODE	PRODUCT NAME	ACTIVATION	ACTIVATOR
04010	SAL06/M.M.I	AUTOMATIC	UML MK5

Date: 25/05/2026
Rev.: 02

FEATURES Code: 04010	
Type	Inflatable life jacket
Activators	04010 – 1UML MK5 automatic 1 MICROMANUAL manual Mouth tube
Canister	2x30 g thread 1/2" GAS
Real buoyancy	275 N TOTAL
Closure system	Safety harness with adjustable waist strap and zip closure
Size	Adult
Supported weight	>40 kg
Waist circumference	80–125 cm
Cover	High-strength fabric
Chamber	Double chamber, PA 420 PU coated material, Spanish yellow
Product packaging	Carry bag in PL 200D, yellow
Packaging	60x40x40 (10 pcs per box)
Warranty	24 months
Inspection	Every 24 months
Veleria San Giorgio reserves the right to modify the technical specifications without prior notice.	

ACTIVATION SYSTEMS:

• **Automatic** - Upon falling into the sea, the system is submerged and automatically activates inflation of the buoyancy chamber within 5 seconds. Automatic activation is achieved using the UML MK5 water-activated inflator through the dissolution of a water-soluble tablet.

• **Manual** - The system is activated by pulling the dedicated handle. It is supplied with the UML Micromanual manual inflator and activates exclusively by hand.

• **Oral** - This type of inflation is performed through the dedicated mouth tube, fitted with a non-return valve and protective cap. To inflate the chamber, simply blow into the mouth tube.

The two superimposed buoyancy chambers are independent yet duly interconnected.

STANDARD ACCESSORIES

LED light - Code 03030

Activates automatically upon falling into the water. Provides visibility up to one mile. SOLAS M.E.D. certified and USCG approved.

Whistle - Code 25180

Accessory for emergency sound signalling. ISO 12402-8 certified.

Spray hood

Reduces the risk of secondary drowning caused by inhaling water spray.

Carry case - Code 1114

Fabric carry case for storing and transporting the life jacket.

Microsphere reflective band - Code 367/795

Soft and flexible reflective band on sewable fabric backing, compliant with EN ISO 20471.

Ring carabiner - Code 528/825

High-strength stainless-steel ring carabiner.

Green light stick - Code 339/804

Light stick activated by bending the tube and shaking to mix and activate the luminescence.

ACCESSORIES ON REQUEST

LED light - Code 03035

Activates automatically in the event of falling into water, in compliance with 14 CFR 25.853.

ESCLUSIVE SAFETY TECNOLOGIES

Safety at sea is our main priority. We manage all research, design and production processes with the utmost care so as to offer certified equipment for all nautical fields, with the highest production standards. All research and development activities are certified by the Department of Applied Science and Technology of the Polytechnic University of Turin, in accordance with EU regulations.

THE PRODUCTION PROCESS AND TRACEABILITY

With the aim of making inflatable life jackets more reliable, in 1994 Veleria San Giorgio introduced the Unique Product Code system. As the only manufacturer in the world to employ this type of technology, VSG is now able to identify all materials and individual components utilised through distinct alphanumeric codes.

Production processes are controlled via software specially developed by VSG, covering 100% of production so each product can be traced back to its buyer with absolute precision. This drastically reduces manufacturing defects (less than 1/10000 of returns), guaranteeing each buyer a unique product in the truest sense of the word and – most importantly – the highest degree of safety when needed.

Thanks to their ergonomic features, our life jackets guarantee an optimal position in the water and great stability. In addition, the vests offer enough buoyancy to rotate and tilt an unconscious person, so as to always keep the airway out of the water.
