# SKIPPER 150 LIGHT

Inflatable life jacket certified to ISO 12402-3, Class 150N, actual buoyancy >150N, bearing a quick-release buckle closure in acetal resin with integrated adjustment.

Designed for recreational boating activities on offshore waters and/or in adverse weather conditions, allowing the wearer to safely await rescue even in rough seas.
Ensures maximum safety for all types of navigation. Easy and intuitive to wear, it provides maximum freedom of movement and mobility during sailing manoeuvres.

## MAIN CHARACTERISTICS

- Quick-release buckle with integrated adjustment
- Rescue handle at nape
- Front lifting handle
- High-strength Velcro closure
- Ergonomic back strap
- Customisation available
- Crotch strap attachment point available

Available in 4 colours:

09230/24/BL

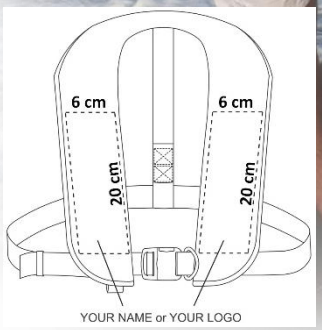

09230/24/NE

09230/24/RO

09230/24/VE

CUSTOMISATION

| Packaging | 60 x 40 x 40 cm (13 items/carton) |
| Warranty | 24 months |
| Service Interval | Every 24 months |
| Optional Accessories | Sprayhood, automatic emergency light, crotch strap. |
| Spare Parts | Whistle, rearming kit |
| Veleria San Giorgio reserves the right to modify the technical specifications without prior notice. | |

## DONNING INSTRUCTIONS

1. Put on the lifejacket

2. Fasten the buckle

3. Adjust the waist strap

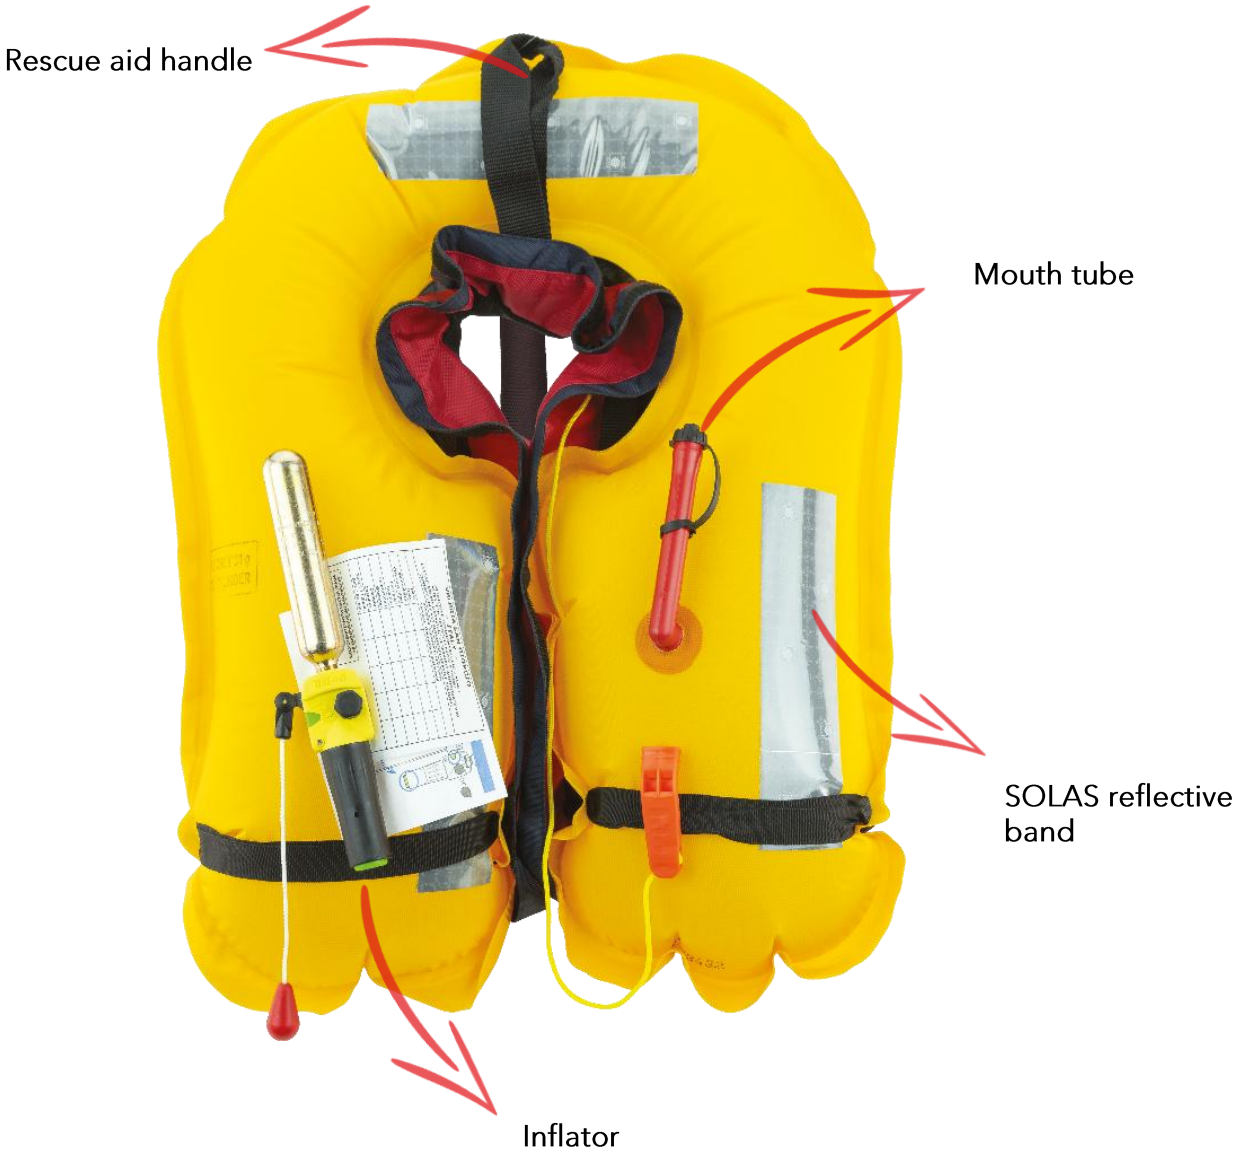

Single-compartment buoyancy chamber in PA 420 PU-coated fabric with electronically-controlled high-frequency welded seams. This ensures an optimal positioning in the water and excellent stability. The buoyancy is enough to rotate and tilt an unconscious person, keeping their airways clear of the water. Even when fully inflated, it does not impede swimming to a safe place or quickly boarding a liferaft.

INFLATION SYSTEMS:

Automatic - Upon falling into the water, the system is submerged and automatically inflates the buoyancy chamber within 5 seconds. Automatic activation is possible with the UML MK5 saline activator, through the dissolution of a water-soluble tablet.

Manual - The system is activated by pulling the dedicated handle. It is supplied with the UML MICROMANUAL manual inflator and is activated exclusively by hand.

Oral - This type of inflation occurs through the dedicated mouth tube fitted with a non-return valve and protective cap. To inflate the chamber, simply blow into the mouth tube.

SPARE PARTS

**Whistle - Code 25180**

Mandatory accessory providing an audible emergency signal. Certified to ISO 12402-8

Rearming:

UML MK5: rearming kit (26233), 33 g cylinder
UML MICROMANUAL: rearming kit (26233), 33 g cylinder

OPTIONAL ACCESSORIES

**Crotch strap - Code 09146**

The use of this accessory improves the tilt, stability and positioning of the body in water.

**LED light - Code 03030**

Automatically activates upon falling into the water. Visible up to one mile. SOLAS M.E.D. and USCG approved.

**Sprayhood - Code 09145/SK**

Reduces the risk of secondary drowning caused by inhaling water spray. Improves visibility of the survivor.

**Crotch strap - Code 09148**

The use of this accessory improves the tilt, stability and positioning of the body in water.

# ESCLUSIVE SAFETY TECNOLOGIES

Safety at sea is our main priority. We manage all research, design and production processes with the utmost care so as to offer certified equipment for all nautical fields, with the highest production standards. All research and development activities are certified by the Department of Applied Science and Technology of the Polytechnic University of Turin, in accordance with EU regulations.

## THE PRODUCTION PROCESS AND TRACEABILITY

With the aim of making inflatable life jackets more reliable, in 1994 Veleria San Giorgio introduced the Unique Product Code system. As the only manufacturer in the world to employ this type of technology, VSG is now able to identify all materials and individual components utilised through distinct alphanumeric codes.

CERTIFICATO N. 26/91/S

ISO 9001:2015

Production processes are controlled via software specially developed by VSG, covering 100% of production so each product can be traced back to its buyer with absolute precision. This drastically reduces manufacturing defects (less than 1/10000 of returns), guaranteeing each buyer a unique product in the truest sense of the word and – most importantly – the highest degree of safety when needed.

Thanks to their ergonomic features, our life jackets guarantee an optimal position in the water and great stability. In addition, the vests offer enough buoyancy to rotate and tilt an unconscious person, so as to always keep the airway out of the water.
